

**FuelCell Energy**  
Ultra-Clean, Efficient, Reliable Power

## **FOR IMMEDIATE DISTRIBUTION**

### **FuelCell Energy Appoints Kurt Goddard as Vice President Investor Relations**

**Danbury, CT – April 6, 2010** – FuelCell Energy (NASDAQ: FCEL) a leading manufacturer of high efficiency ultra-clean power plants using renewable and other fuels for commercial, industrial, government, and utility customers today announced that Kurt Goddard has been appointed to the position of Vice President of Investor Relations. Mr. Goddard will be responsible for communicating the strategy and financial results of the Company while building relationships with investors and analysts.

Prior to joining FuelCell, Mr. Goddard was senior manager investor relations for Terex Corporation, a diversified global manufacturer of construction and lifting equipment where he spent almost 12 years in Investor Relations and other finance roles. He worked closely with management to increase the analyst coverage of Terex and enhanced the communications efforts of the Company through investor presentations, targeted investor outreach and investor oriented website improvements. He was also part of the team that created the Financial Planning & Analysis department and he played an active role in the Treasury group, including trade finance and establishing global cash management systems. Prior to Terex, he helped to establish global treasury operations for Iomega Corporation, a computer storage manufacturer and began his finance career as a lending officer in commercial banking.

“We are pleased to welcome Kurt to FuelCell Energy,” commented R. Daniel Brdar, Chairman and CEO of FuelCell Energy. “His experience in investor relations and corporate finance with high growth companies is particularly well suited for the needs of the Company as we keep investors informed of our growth.”

Mr. Goddard holds an MBA in Finance from the University of Texas at Austin and a Bachelor of Science – Business Administration from the University of Delaware.

#### ***About FuelCell Energy***

DFC® fuel cells are generating power at over 50 locations worldwide. The Company’s power plants have generated over 450 million kWh of power using a variety of fuels including renewable wastewater gas, biogas from beer and food processing, as well as natural gas and other hydrocarbon fuels. FuelCell Energy has partnerships with major power plant developers and power companies around the world. The Company also receives funding from the U.S. Department of Energy and other government agencies for the development of leading edge technologies such as fuel cells.
