

**FuelCell Energy**  
Ultra-Clean, Efficient, Reliable Power

## **FOR IMMEDIATE DISTRIBUTION**

### **FuelCell Energy Promotes Anthony Rauseo to Newly Created Chief Operating Officer Position**

**Danbury, CT – July 6, 2010** – FuelCell Energy, Inc. (NASDAQ: FCEL) a leading manufacturer of high efficiency ultra-clean power plants using renewable and other fuels for commercial, industrial, government, and utility customers today announced the promotion of Anthony (‘Tony’) Rauseo to the newly created position of Chief Operating Officer. This position will be responsible for closely integrating the manufacturing operations with the supply chain, product development and quality, and will report directly to the Chief Executive Officer.

“The creation of this Chief Operating Officer position is in response to the needs of the Company as we prepare for growth,” said R. Daniel Brdar, Chairman and Chief Executive Officer. “Tony Rauseo is the ideal choice for this role due to his extensive experience with product development and manufacturing advancement, his continual focus on quality and process improvement, and his collaborative management style.”

Mr. Rauseo was Vice President of Engineering and Chief Engineer, having joined FuelCell Energy in 2005. Through his leadership, FCE has accomplished significant year-over-year product cost reductions, significantly improved product operational reliability and shortened product development cycle-time. Prior to joining FuelCell Energy, Tony held a variety of key management positions in manufacturing, quality and engineering. Tony was with CiDRA Corporation for 5 years, where he led the ramp-up of high volume telecom product manufacturing. Prior to joining CiDRA, Tony was with Pratt and Whitney for 17 years where he held various leadership positions in product development, production and customer support of aircraft turbines. Mr. Rauseo holds a Bachelor Science Mechanical Engineering from Rutgers University and a Masters Science Mechanical Engineering from Rensselaer Polytechnic Institute.

#### ***About FuelCell Energy***

DFC® fuel cells are generating power at over 50 locations worldwide. The Company’s power plants have generated over 500 million kWh of power using a variety of fuels including renewable wastewater gas, biogas from beer and food processing, as well as natural gas and other hydrocarbon fuels. FuelCell Energy has partnerships with major power plant developers and power companies around the world. The Company also receives funding from the U.S. Department of Energy and other government agencies for the development of leading edge technologies such as fuel cells.
