On-site Clean Power for Healthcare
Reducing Operating Costs and Enhancing Power Reliability

Improves patient care with reliable and resilient power
- Predictable power generated on-site
  - Not dependent on weather or time of day
- Ensuring energy security when it matters most
- Unobtrusive – quiet, vibration-free and compact footprint

Reduces Operating Costs
- Affordable power priced below the grid
- Pay for power as it is produced – avoiding capital investment
- Highly efficient combined heat and power (CHP) further supports economics and sustainability goals

Advances sustainability with environmentally-friendly power
- Ultra-clean power using chemistry, not combustion
  - Avoids criteria pollutants
- Supports sustainability initiatives
- Low carbon footprint

SureSource Solutions

Delivering Customer Satisfaction

Hartford Hospital, Connecticut

- Combined heat and power (CHP) fuel cell produces continuous supply of ultra-clean electricity and heat to the 867 bed facility
- Generating cost savings from high efficiency and availability of 1.4 megawatt (MW) SureSource solution
- Advancing sustainability by avoiding the emission of more than 6,700 tons of CO₂ per year; equivalent to removing more than 1,200 cars from the road
- Located next to the facility, occupying only 2,250 square feet

University of California Irvine - Medical Center

- Configured for combined cooling, heating, and power (CCHP), the same unit of fuel generates on-site electricity and steam for facility heating and absorption chilling
- Generates 1.4 megawatts of continuous and Ultra-clean power, meeting approximately 30% of this 412 bed facility
- Steam supplied to an absorption chiller producing 200 tons of cooling for an office building and associated institutional requirements
- Supports sustainability by avoiding more than 28 tons of NOₓ, 64 tons of SOₓ, 3,000 pounds of particulate matter and 7,000 tons of CO₂

Financing & Service

Both Hartford Hospital and UCI Medical Center enjoy the advantages of:

- **Power Purchase Agreements** – Avoiding the capital investment of on-site power generation by paying for power as it is produced.
- **Long-term Service Agreements** – FuelCell Energy performs all operation, maintenance and service of the SureSource power solutions on behalf of customer.

**ABOUT FUELCELL ENERGY**

FuelCell Energy (NASDAQ: FCEL) delivers efficient, affordable and clean solutions for the supply, recovery and storage of energy. We design, manufacture, undertake project development, install, operate and maintain megawatt-scale fuel cell systems, serving utilities, industrial and large municipal power users with solutions that include both utility-scale and on-site power generation, carbon capture, local hydrogen production for transportation and industry, and long duration energy storage. With SureSource installations on three continents and millions of megawatt hours of ultra-clean power produced, FuelCell Energy is a global leader with environmentally responsible power solutions.
